PROFESSIONAL SUMMARY

Enthusiastic and driven Software Engineering undergraduate actively seeking an IT internship to apply academic knowledge and hands-on project experience in a real-world environment. Looking forward to learning from experienced professionals, contributing to real solutions, and developing both technical and teamwork skills in a collaborative setting.

PROJECTS

LifeBlood - Blood Donation Management System
Flutter, Firebase, Supabase, Twilio
A dual application system (mobile for donors, desktop for hospital staff) streamlining blood donation management.
GitHub (mobile): LifeBlood-Blood-Donation-App (mobile)
GitHub (desktop): LifeBlood-Blood-Donation-DesktopApp (desktop)

ShuttleMaster - NSBM Transportation App
Flutter, Firebase, Twilio, Stripe, Node.js
Mobile app for NSBM students/lecturers providing real-time bus schedules, online booking, secure payments, and communication features.
GitHub: ShuttleMaster-Bus-Ticket-Booking-App

GO-SURF.LK - Online Surfboard Renting System
HTML, CSS, JavaScript, PHP, MySQL
Online platform for surfboard rentals, offering user management, order tracking, feedback, an admin panel, and surfing training.
GitHub: GO-SURF-Surfboard-Renting-Website

SilverKnight Cinema - Online Movie Booking System
Java, JSP/Servlet, HTML, CSS, JavaScript, SQL Server
Web-based movie ticket booking system with online booking, secure payments, seat selection, and admin tools for cinema operations.
GitHub: SilverKnightCinema-Movie-Ticket-Booking-Website

AirMetrix AQI – Air Quality Monitoring Dashboard
ASP.NET Core, C#, HTML, CSS, JavaScript, SQL Server, Leaflet, Chart.js
A web-based dashboard for visualizing real-time air quality data using interactive maps and charts. Includes location-based AQI readings, historical trends, and data management via an admin panel.
GitHub: AirMetrix-AQI-Monitoring-Dashboard
